

Tyrannosaurus rex

PICTURE 01 OF 20

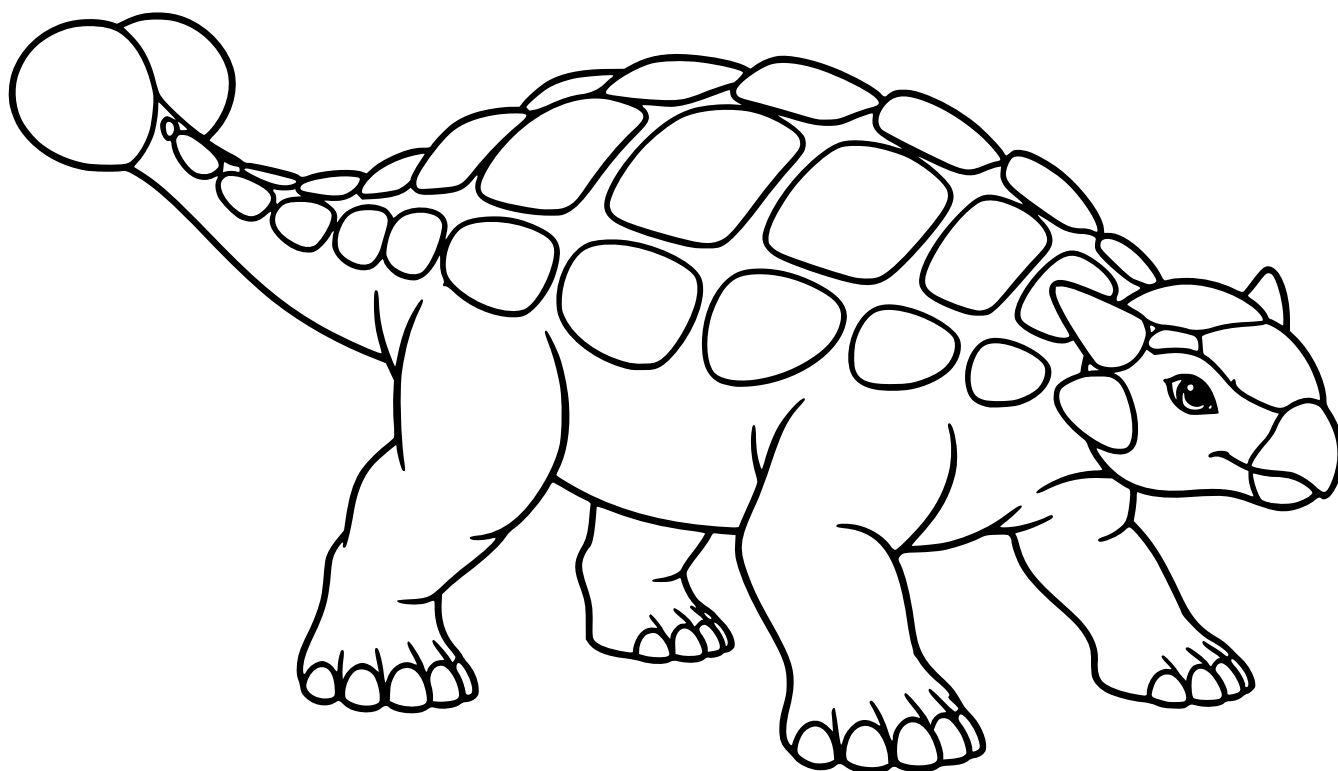

DID YOU KNOW?

Tyrannosaurus rex grew replacement teeth throughout its life, so a broken tooth did not leave a permanent gap.

Fact source: What Do You Know About T. rex?

Ankylosaurus

PICTURE 06 OF 20

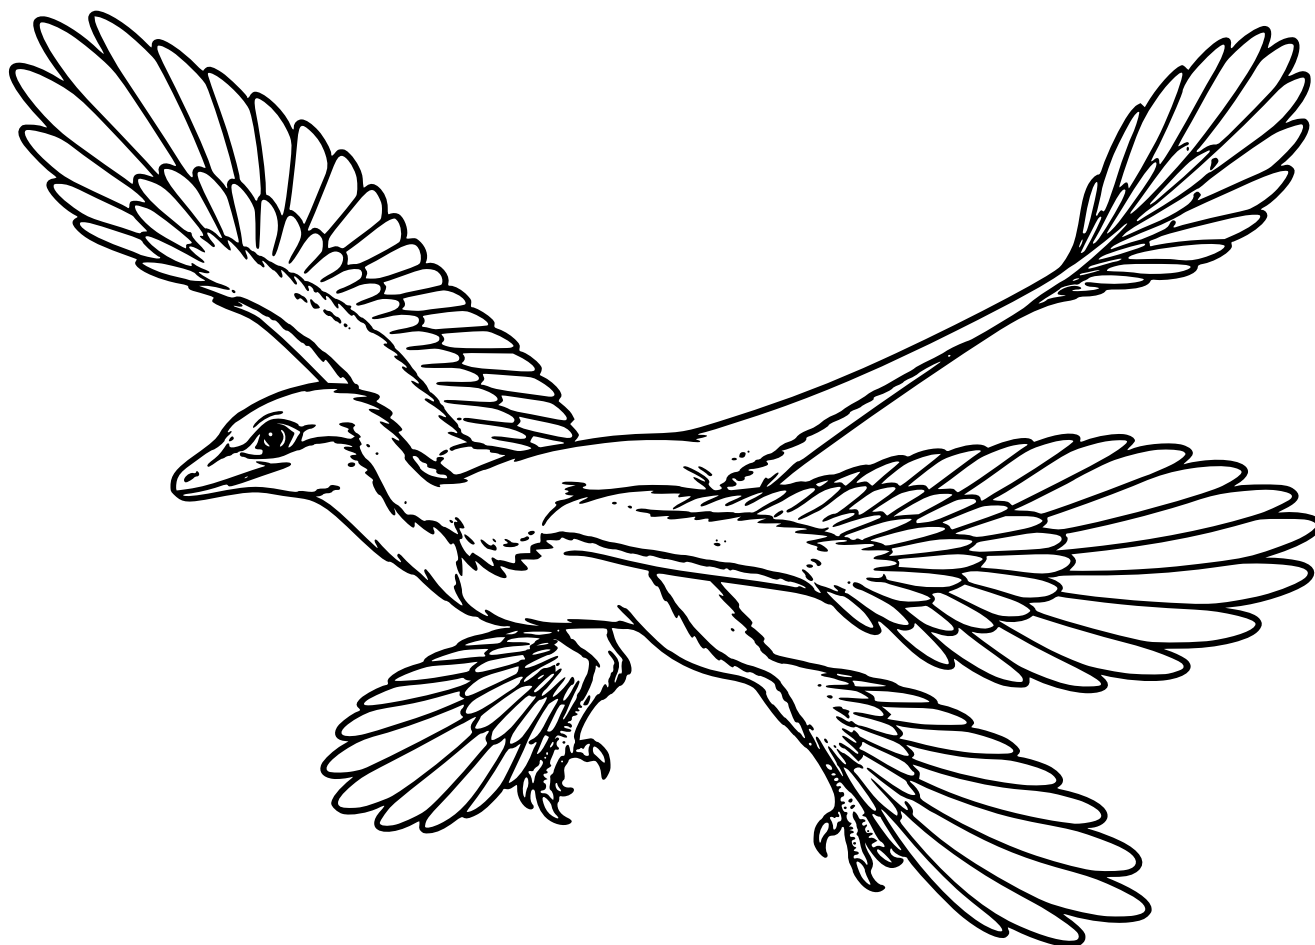

DID YOU KNOW?

Ankylosaurus had a tail club made from enlarged bony plates wrapped around the end of a stiff tail.

Fact source: Unusual cranial and postcranial anatomy in the archetypal ankylosaur *Ankylosaurus magniventris*

Microraptor

PICTURE 11 OF 20

DID YOU KNOW?

Microraptor had long feathers on both its arms and legs, giving this little dinosaur four wing-like surfaces.
